

AMX
KEYPADS

COMMAND

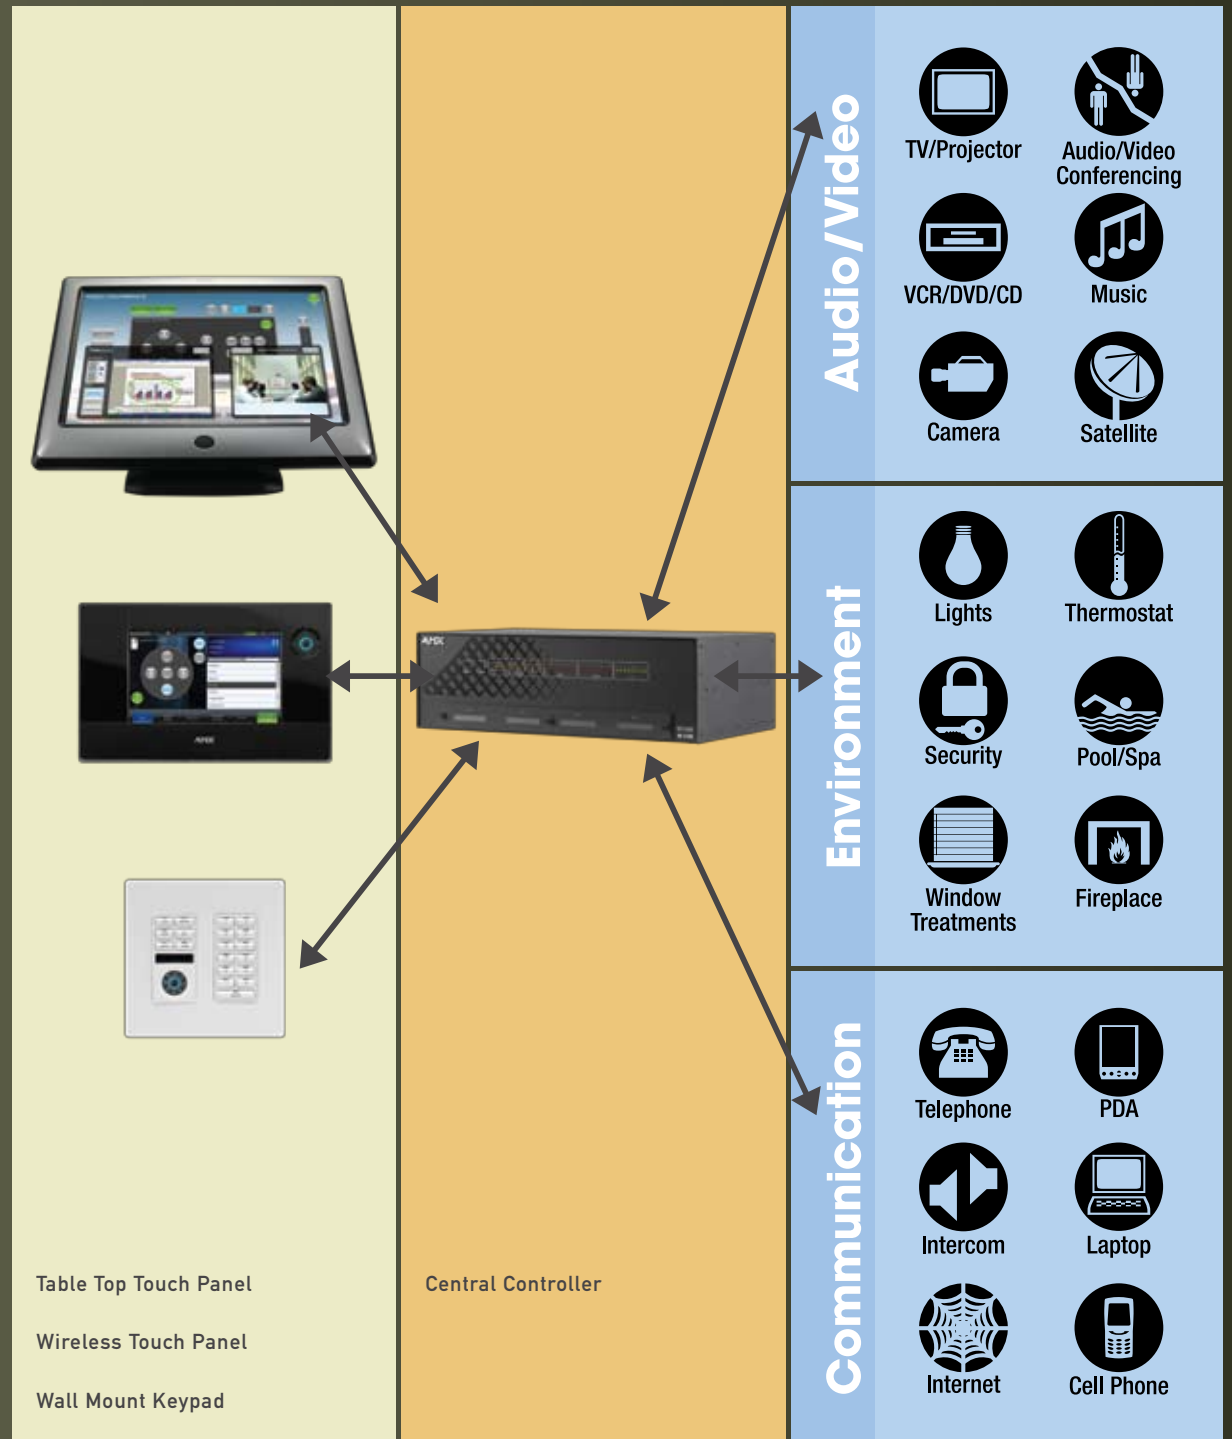

Control system operations begin with the user interface, AMX Touch Panels and Keypads, which use a combination of touch-activated buttons and icons to easily and effortlessly navigate the system and carry out any required command. Whether you need to lower the blinds or launch a fleet of jets, these interfaces are simple to operate, but smart enough to group the hundreds of required steps to deliver instantaneous, automated directions – all with the slightest touch.

CONTROL

From controlling one component to managing 1000 devices, no job is too large or too small for AMX NetLinX Integrated Controllers, the nerve centers of every control system. With smart processors and powerful memory reserves, these controllers can carry out multiple automated command sequences to produce instant, flawless results from the devices they control.

COMMUNICATE

The AMX Control System was designed to communicate with the electronic devices that populate our entire world. From CD changers, plasma screens and jacuzzi jets, to cameras, projectors and communication satellites, AMX is ready to command, control and communicate with life around us – easily, accurately and efficiently.

TRULY ENJOYING THE SOUND OF MUSIC

As you awaken to a soft, amber glow filling the room, you reach over and touch "IPOD" on your Metreau Keypad and are instantly immersed in the opening chords of Vivaldi's "Concerto in G Minor". On your way to the shower, you dial up the volume on your bathroom keypad a couple of more notches - you don't want to miss a single note. With Metreau Keypads, getting more out of life is just a touch away. After getting dressed, you head downstairs to join your kids at the table who are enjoying their cereal while listening to Radio Disney. Another quick press of your kitchen keypad gives you a morning traffic report. As your family heads out the door together, a touch of "AWAY" powers down your house, adjusts the temperature to 78 degrees and arms the security system - with Metreau Keypads, life keeps getting easier.

Light It Up

As you crank up the volume, a row of blue LEDs give you a visual indicator of where the volume is going and what level you're at.

**"2" For Margaritaville –
"8" For Big 80s**

Whether you're in the mood for Outlaw Country, Totally 70s or Classic Vinyl, just hit your preset button and your favorite Satellite Radio channel begins playing.

**Honky Tonk Women To
Gimme Shelter**

With a press to the right, you can skip to the next song on your Rolling Stones' iPod Playlist as well as go left to skip back or up, down and center for menu navigation.

Sophisticated Elegance

Metreau was designed to elegantly blend into decorative wallplates and are available in black, white and light almond to match a variety of color schemes.

Guiding Light

With several audio sources to choose from on your Tango system, sometimes it's hard to know what you're listening to. A handy blue LED in the top center of each button identifies the currently selected source.

METREAU KEYPADS RESIDENTIAL

TEACHER'S PET

Classroom resources are no longer limited to overhead projectors and pull-down screens. Modern classrooms include a myriad of devices designed to support the teacher but in reality, can rob them of precious teaching time. But Metreau Keypads change all that with simple, easily identified buttons that in a single touch can execute a variety of tasks to help you reach your end goal. Say you want to show a Discovery Channel DVD that requires powering on the projector, DVD player and audio system, lowering the projection screen, turning out the lights and starting the DVD. With Metreau, a press of "DVD" is all it takes. And volume adjustment and skipping to the next chapter are a simple dial and press away of your navigation wheel. Metreau Keypads - giving teachers more time to actually educate their students.

Go Wireless

When you want to change slides on a PowerPoint from the back of the room, just point your AMX R-1 remote control in the direction of your keypad and the integrated infrared sensor will take care of the rest.

"We Can't Hear It Back Here."
To adjust the volume of your DVD, simply dial your navigation wheel up or down. It's also just as handy to dim room lights.

Help Is Just A Push Away

An uncontrollable fight has broken out in your room and you need help – a push of a button and the principal is immediately summoned.

Password Protected

Need to escort a sick child to the nurse, but worry about idle hands accessing the classroom keypad? Just set up a four-digit password of your choice and when you have to leave the room, your keypad is always locked down.

ENTRY COMMUNICATIONS NEVER LOOKED THIS GOOD

Wouldn't it be nice to have a doorbell that did things you never dreamed possible?

As your visitors drive up, they are greeted at your access gate with a message that says "Welcome to the Harper's". They push the doorbell button and inside, you hear a familiar door tone because you selected it. You go to the nearest touch panel and visually identify your visitors thanks to the integrated camera inside the Communicator. The included microphone and speaker allow you to exchange pleasantries and invite them up the drive. With another press of a button you open the gate right from your touch panel. The Metreau Entry Communicator – taking the doorbell to unimaginable places.

Welcome To The Harper's
Post a friendly personalized
welcome message, your
address and even an image
if you'd like directly on
the display.

See And Hear

Not only talk to your visitors
but see them via integrated
color camera, which is easily
angled right, left or center to
provide the best view of the
visitor.

Ring My Bell

A dual-color LED light button
is provided for feedback
and doorbell notification.
You have a choice of several
different doorbell tones to
choose from.

Weather Resistant

The Entry Communicator
without integrated display
is weather resistant and
ideal for use in outdoor
environments such as
access gates or outer doors.

SETTING THE STANDARD

There's nothing you enjoy more at the end of a long day than heading out to your spa for a massaging soak while listening to an iPod playlist of your favorite blues jams. You absolutely love your DMS Pinnacle because with just a touch of "SPA" on any of your keypads throughout your home, your spa begins warming to your personal preference of 101 degrees and the jets are instantly activated. In addition, your outdoor lighting fades up and your Tango Audio System and iPod are given the go-ahead to start the evening with Mr. Buddy Guy. And if you do have to take a quick phone call in your cabana, pausing the music, lowering the volume and silencing the jets are all a touch away. The DMS Pinnacle – setting the standard for whole home keypads.

Slide And Glide
 The DMS Pinnacle's exclusive fingertip slider allows users to glide through items, lists and pages.

Press And Scroll
 When you want to zip through your iPod's songs from A to Z, the press and scroll function is ideal.

Alanis To Zz Top
 The ingenious Dynamic Menu System gives you the power to quickly scroll through hundreds of artists on your iPod to find the one you want to listen to.

101 Degrees In The Shade
 When making temperature adjustments to your Spa as well as executing other system functionality, it's nice that they're clearly written with a large, easily recognizable font.

Complementary Colors
 DMS and DMS Pinnacle Keypads are available in beige, black, light almond and white, to complement the Lutron® Architectural Matte Color Collection.

Feel Your Way
 You've just gone to bed but forgot to arm your security system. Just reach over to your keypad and feel for the 3rd button from the bottom. The buttons are raised a bit to allow them to be located by feel. You find it, press it and voila, system armed.

DMS KEYPADS

WHERE BUSINESS TURNS FOR COST EFFECTIVE CONTROL

You own a small law firm and have discovered the possibilities that an AMX control system paired with Mio Modero Classic and Prestige Keypads can offer you to automate your office and make it more energy efficient. With Classic Keypads installed in every conference room, whenever you press “Lights On,” your lights are already dimming to 75% and while practically unnoticeable in light output, you’re cutting energy costs by 25%. You also have several Prestige Keypads in various locations as well that were added because of the flexibility they offer in being able to change the pre-printed paper insert in every button window instantly when you need to change the functionality of your buttons. Mio Modero Classic and Prestige Keypads – where business is turning for cost effective control.

The Choice Is Clear

Clear buttons give Prestige owners the unique ability to change button functions using an included sheet of pre-printed text and icon inserts. Users can also create their own inserts on a printer to further personalize their buttons with color font and additional icons.

Double-Wide

Two horizontal buttons may be replaced with a double-wide, rectangular button.

Touch And You Shall Enjoy

With a press of "CD", your CD player and audio system are turned on and your new Coldplay CD begins playing to get you through prepping your next deposition.

DVD, TV, SAT – It's Your Call

No matter what the source, it's just a press away with the clear, easily identified source and function buttons.

Hit The Lights

By pressing "Lights On," you won't just be increasing light in your office, you'll be increasing the bottom line by only having the lights fade up to 75% full. You won't even notice the difference in light output but you certainly will notice a difference on your bill.

Laser Engraving

The Classic utilizes solid, laser-engraved buttons that are personalized with the function or device required.

CLASSIC AND PRESTIGE**

CAN'T LIVE WITHOUT IT

Your clubs are packed, the car is ready and it's a gorgeous Saturday for golf. You're on your way to play a brand new course even though it's a two-hour drive. As you adjust your ViewStat Thermostat, your 3.5" color display is showing a thunderstorm icon for today's forecast. You hadn't checked the weather and although it's beautiful now, you determine that just about the time you'll be teeing off, storms will be rolling in and ruining your trip. You reschedule for next week and once again, your ViewStat has saved the day. With current conditions, time, date, worldwide five-day forecast, color display and of course, precise temperature control and scheduling, you'll discover why the ViewStat Thermostat quickly becomes a resource you can't live without.

Color Display
Features a bright, crisp 3.5" color display to reproduce vivid color images and graphic icons – setting a new standard for thermostats.

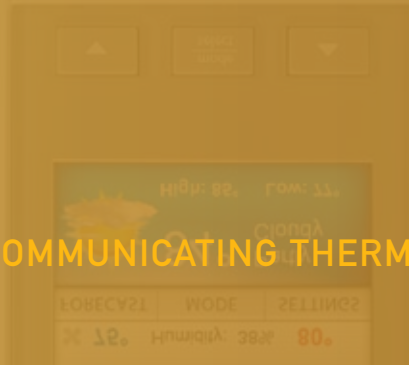

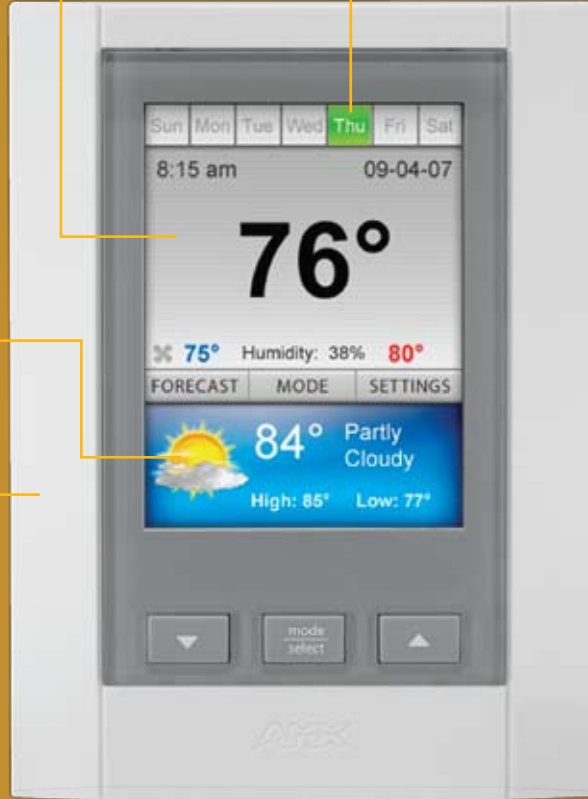

Remote Sense-ability
A convenient remote temperature sensor is included for reading outdoor temperature or the temperature in a second zone.

Instant Weather And Forecasts
Current temperature, weather conditions and a five-day forecast for the local area or any location worldwide are displayed with weather icons such as sun, clouds and rain.

ENERGY STAR And Title 24 Compliant
To ensure you are doing your part to protect the environment, this thermostat meets the strict, ENERGY STAR efficiency guidelines set by the EPA and US Department of Energy as well as Title 24 Compliance guidelines set by the state of California.
